

Ashton Breer

| 425-449-6520 | Ashtonbreer@yahoo.com |

EDUCATION

University of California, Irvine

Bachelor of Science in Computer Science

Expected Graduation: 2028

EXPERIENCE

Target – Bellevue, Washington (full-time)

Style Consultant

Summer 2025

- Assisted customers in identifying needs and provided personalized solutions, improving problem-solving and communication skills.
- Collaborated with team members in a fast-paced environment, ensuring efficiency and teamwork.
- Managed multiple responsibilities simultaneously, demonstrating adaptability and time management.

Tam O'Shanter Golf Course – Bellevue, Washington (part-time)

Pro Shop Assistant

June 2022 – September 2024

- Delivered exceptional customer service by greeting guests, answering inquiries, and resolving issues in a professional manner.
- Maintained daily operations, including managing the cash register, closing the shop, and collecting golf carts.
- Assisted with golf instruction courses by supervising participants and providing guidance during sessions.

PROJECTS

AI Sports Play Prediction Platform

August 2025 – Present

- Continuing to develop full-stack React/JavaScript/FastAPI application that predicts NFL and NBA plays using ensemble machine learning models
- Processed 356K+ NFL plays and 16M+ NBA events through data pipeline, achieving prediction accuracy with Random Forest/XGBoost
- Built interactive 3D visualizations with Three.js and REST API handling real-time game situation analysis
- Implemented SQLite database with proper error handling and CORS configuration

K-Nearest Neighbors Classifier

[GitHub](#)

February – March 2025

- Implemented KNN algorithm using Python/pandas for geographic temperature classification
- Optimized Euclidean distance calculations with NumPy, reducing computation time by 40% and achieving 80% accuracy
- Built complete ML workflow with configurable k-values and majority voting system

Grin Language Interpreter

[GitHub](#)

May – June 2025

- Implemented a custom interpreter in Python that parses and executes a Grin programming language with 13 commands, including variables, loops, and subroutines
- Built lexical analysis and parsing system using object-oriented design to support 6 comparison operators and control flow
- Built label resolution system that maps program labels to line numbers for jump target execution across the codebase

Activities

Irvine Hacks 2026 – Participant: Developing web application

Video Game Development 2024 – Worked as part of a team to create a 2D RPG game using Godot Engine

AI For All 2024-2025 – Member: Participating in application workshops

SKILLS

Skills Programming: Python, HTML, C++, SQL

Frameworks & Libraries: FastAPI, Scikit-learn, Pandas, NumPy, Git, GitHub, REST APIs, Linux
